Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two-story frame structure in a rectangular plan. It has a four-bay by two-bay main section with a two-bay, one-story rear addition. The structure has a one-story, full-length porch with ornamental brackets and an ornate cut-out railing. The main facade has an entrance in the second bay from the west and one-over-one sash windows in the other bays. The structure sits on a high stone foundation with a full-length foundation story on the main facade. The structure appears to date from the mid-19th century.

The property is located on the north side of Sandy Hook Road, approximately .07 mile west of Clark Road, in Sandy Hook. The house sits back slightly from the road and has a stone retaining wall along the sidewalk. The main facade faces south.

The two-story structure is constructed of frame covered in a modern aluminum siding. The main facade has a full-story foundation with the porch supported by stone ends covered in lattice-work. A central stair rises up to the porch level. A full-length, one-story porch is the main ornamental feature of the house. It has an elaborate design on its cut-out railing. Porch posts are chamfered and have ornamental brackets. The porch roof has a bracket cornice and pendants. The main story has a entrance in the second bay from the west. One-over-one sash windows are in the other bays on the first story, the four bays of the second story and two on each story in the gable ends. The rear addition is one story with a shed roof and has similar windows in its two bays. Interior-end brick chimney stacks with corbelled caps rise from each gable end.

There are no significant outbuildings on the property.
